Feature: Checkout Complete Functionality across users

Scenario Outline: Verify the checkout complete page and "Back Home" button functionality as "<username>"

- ✓ **Given** The user is logged in as a "<username>"
- ✓ **When** The user adds a product to the cart
- ✓ **And** The user clicks on the cart icon
- ✓ **And** The user clicks on the "Checkout" button
- ✓ **And** The user types the first name, last name, and postal code in each field
- ✓ **And** The user clicks on the "Continue" button
- ✓ **And** The user clicks on the "Finish" button
- ✓ **Then** A message "Thank you for your order!" should be displayed on the checkout complete page
- ✓ **When** The user clicks on the "Back Home" button
- ✖ **Then** The user should be redirected to the products page with title "Products" within 2 seconds

- **And** The cart badge should be empty and the button should change to "Add to cart"

Examples:

	username
✓	standard_user
✗	performance_glitch_user

Scenario Outline: Use menu bar as "<username>" in the checkout complete page

- ✓ **Given** The user is logged in as a "<username>"
- ✓ **When** The user adds a product to the cart
- ✓ **And** The user clicks on the cart icon
- ✓ **And** The user clicks on the "Checkout" button
- ✓ **And** The user types the first name, last name, and postal code in each field
- ✓ **And** The user clicks on the "Continue" button
- ✓ **And** The user clicks on the "Finish" button
- ✓ **And** The user clicks on the menu bar
- ✓ **Then** The menu should be displayed
- ✓ **When** The user clicks on "All Items"
- ✓ **Then** The user should be redirected to the products page
- ✓ **When** The user clicks on the menu bar
- ✓ **And** The user clicks on "About"
- ✓ **Then** The user should be redirected to the Sauce LAB website
- ✓ **When** The user clicks on "Logout"
- ✓ **Then** The user should be logged out and redirected to the login page
- ✓ **When** The user enters username "<username>" and password "secret_sauce"
- ✓ **And** The user clicks the login button
- ✓ **And** The user clicks on the cart icon
- ✓ **And** The user clicks on the "Checkout" button
- ✓ **And** The user types the first name, last name, and postal code in each field
- ✓ **And** The user clicks on the "Continue" button
- ✓ **And** The user clicks on the "Finish" button
- ✓ **And** The user clicks on "Reset App State"
- ✓ **And** The user clicks on "All Items"
- ✓ **Then** The cart should be empty and all buttons should be reset to "Add to cart"

Examples:

	username
✓	standard_user
✓	performance_glitch_user

✓  classpath:features/checkout_ov.feature

@checkout @regression

Feature: Checkout Overview Functionality across users

Scenario Outline: Verify the checkout overview page and "Finish" button functionality as "<username>"

- ✓ **Given** The user is logged in as a "<username>"
- ✓ **When** The user adds a product to the cart
- ✓ **And** The user clicks on the cart icon
- ✓ **And** The user clicks on the "Checkout" button
- ✓ **And** The user types the first name, last name, and postal code in each field
- ✓ **And** The user clicks on the "Continue" button
- ✓ **Then** The correct prices and total should be displayed on the checkout overview page
- ✓ **When** The user clicks on the "Finish" button
- ✓ **Then** The user should be redirected to the page with title "Checkout: Complete!"

Examples:

	username
✓	standard_user
✓	performance_glitch_user

Scenario Outline: Verify the checkout overview page and "Cancel" button functionality as "<username>"

- ✓ **Given** The user is logged in as a "<username>"
- ✓ **When** The user adds a product to the cart
- ✓ **And** The user clicks on the cart icon

- ✓ **And** The user clicks on the "Checkout" button
- ✓ **And** The user types the first name, last name, and postal code in each field
- ✓ **And** The user clicks on the "Continue" button
- ✓ **And** The user clicks on the "Cancel" button
- ✗ **Then** The user should be redirected to the products page with title "Products" within 2 seconds

Examples:

	username
✓	standard_user
✗	performance_glitch_user

Scenario Outline: Use menu bar as "<username>" in the checkout overview page

- ✓ **Given** The user is logged in as a "<username>"
- ✓ **When** The user adds a product to the cart
- ✓ **And** The user clicks on the cart icon
- ✓ **And** The user clicks on the "Checkout" button
- ✓ **And** The user types the first name, last name, and postal code in each field
- ✓ **And** The user clicks on the "Continue" button
- ✓ **And** The user clicks on the menu bar
- ✓ **Then** The menu should be displayed
- ✓ **When** The user clicks on "All Items"
- ✓ **Then** The user should be redirected to the products page
- ✓ **When** The user clicks on the menu bar
- ✓ **And** The user clicks on "About"
- ✓ **Then** The user should be redirected to the Sauce LAB website
- ✓ **When** The user clicks on "Logout"
- ✓ **Then** The user should be logged out and redirected to the login page
- ✓ **When** The user enters username "<username>" and password "secret_sauce"
- ✓ **And** The user clicks the login button
- ✓ **And** The user clicks on the cart icon
- ✓ **And** The user clicks on the "Checkout" button
- ✓ **And** The user types the first name, last name, and postal code in each field
- ✓ **And** The user clicks on the "Continue" button
- ✓ **And** The user clicks on "Reset App State"
- ✓ **And** The user clicks on "All Items"

- ✓ **Then** The cart should be empty and all buttons should be reset to "Add to cart"

Feature: Product Page Functionality for standard_user

Scenario: Add and Remove a product from cart as standard_user

- ✓ **Given** The user is logged in as a "standard_user"
- ✓ **When** The user adds a product to the cart
- ✓ **Then** The cart badge should show "1" and the button should change to "Remove"
- ✓ **And** The user removes the product from the cart
- ✓ **Then** The cart badge should be empty and the button should change to "Add to cart"

Scenario: Use menu bar as standard_user

- ✓ **Given** The user is logged in as a "standard_user"
- ✓ **When** The user adds a product to the cart
- ✓ **And** The user clicks on the menu bar
- ✓ **Then** The menu should be displayed
- ✓ **When** The user clicks on "All Items"
- ✓ **Then** The user should be redirected to the products page
- ✓ **When** The user clicks on "About"
- ✓ **Then** The user should be redirected to the Sauce LAB website
- ✓ **When** The user clicks on "Logout"
- ✓ **Then** The user should be logged out and redirected to the login page
- ✓ **When** The user enters username "standard_user" and password "secret_sauce"
- ✓ **And** The user clicks the login button
- ✓ **And** The user clicks on "Reset App State"
- ✖ **Then** The cart should be empty and all buttons should be reset to "Add to cart"

► Failure Screenshot

Scenario: Navigation to a product's details page as standard_user

- ✓ **Given** The user is logged in as a "standard_user"
- ✓ **When** The user adds a product to the cart
- ✓ **And** The user clicks on a product's name
- ✓ **Then** The user should be redirected to the product's details page and the product's name, description, and price should be displayed
- ✓ **And** The "Add to cart" button should be displayed if the product is not in the cart, or the "Remove" button should be displayed if the product is already in the cart
- ✓ **When** The user clicks on "Add to cart" or "Remove" Button in the details page
- ✓ **And** The user clicks on the "Back to products" button
- ✓ **Then** The user should be redirected to the products page
- ✓ **And** The product's button should be updated to either "Add to cart" or "Remove" based on the previous action

Scenario: Use product sorting functionality as standard_user

- ✓ **Given** The user is logged in as a "standard_user"
- ✓ **When** The user clicks on the product sorting container
- ✓ **And** The user clicks on option A-Z
- ✓ **Then** The products should be sorted in ascending order by name
- ✓ **When** The user clicks on the product sorting container
- ✓ **And** The user clicks on option Z-A
- ✓ **Then** The products should be sorted in descending order by name
- ✓ **When** The user clicks on the product sorting container
- ✓ **And** The user clicks on option Low-High
- ✓ **Then** The products should be sorted in ascending order by price
- ✓ **When** The user clicks on the product sorting container
- ✓ **And** The user clicks on option High-Low
- ✓ **Then** The products should be sorted in descending order by price
